Ansh Bhandari

+91-8417962000 | anshbhandari.13@gmail.com | linkedin.com/in/ansh-bhandari0407 | github.com/Ansh0407

Professional Summary

Analytical and adaptable **Software Engineer** with a solid foundation in **software development, database management, and scalable system design**. Skilled in **Java, Python, SQL, and modern frameworks** such as **React, Node.js, and Spring Boot**. Experienced in developing and integrating **RESTful APIs**, optimizing application performance, and ensuring data consistency across platforms. Recognized for writing clean, maintainable code and collaborating effectively in cross-functional teams. Passionate about continuous learning, innovation, and delivering efficient, user-focused solutions.

Education

CHRIST (Deemed to be University) — Bangalore, Karnataka
Master of Computer Applications, 8.35 CGPA — *July 2023 – May 2025*

CHRIST (Deemed to be University) — Bangalore, Karnataka
Bachelor of Computer Applications, 8.79 CGPA — *August 2020 – May 2023*

Professional Experience

BlueStock Fintech | SDE Intern — January 2025 – February 2025

- Collaborated with cross-functional teams to integrate APIs, optimize UI responsiveness, and improve overall system efficiency.
- Converted design prototypes into functional and reusable React components, elevating user experience and consistency.
- Applied best practices for performance tuning, accessibility, and responsive web design.
- Diagnosed and resolved frontend issues, ensuring high reliability and stability across devices.

Projects

CipherCast | ***React, Tailwind CSS, Solidity, Web3.js, Hardhat, MetaMask, Ethereum Blockchain*** — Source Code

- Engineered a decentralized **e-voting platform** with **React** and **Solidity**, enabling secure and transparent elections.
- Authored and deployed **smart contracts** via **Hardhat**, ensuring reliable voter registration and vote validation.
- Integrated **Web3.js** and **MetaMask** to streamline wallet-based authentication and blockchain interaction.
- Executed rigorous testing on **Hardhat** and **Sepolia networks**, verifying functionality and data integrity.

T-Une | ***React, Node.js, Express.js, MySQL*** — Source Code

- Designed a dynamic **music web app** enabling users to explore personalized genres and trending tracks.
- Enhanced API performance within the **Express.js backend**, supporting real-time data updates.
- Elevated user engagement by 20% through optimized rendering and an interactive UI architecture.

Foodie | ***ReactJS, NodeJS, ExpressJS, Axios, JWT, MySQL, Aiven, Vite, Vercel*** — Source Code

- Constructed a full-stack **food ordering system** featuring live cart updates and order tracking functionality.
- Applied secure **JWT-based authentication** for multi-device access and session persistence.
- Refined checkout flow and API logic, enhancing load speed and reducing user drop-offs by 25%.

HarvestSphere | ***Java, Firebase, PyTorch, TensorFlow, Razorpay API, Volley*** — Source Code

- Architected an **agri-tech platform** using **TensorFlow** and **PyTorch** for early crop disease detection.
- Devised real-time data collection pipelines through **Firebase Realtime Database**.
- Integrated **Razorpay API** for secure digital transactions between farmers and buyers.

Achievements

- Awarded the **Commendation Scholarship** for academic excellence during BCA studies.
- Presented research at the **5th International Multidisciplinary Conference on Information Science**.
- Represented **Christ University** at the **Smart India Hackathon**, among 100+ selected teams nationwide.

Skills

Programming Languages: Java, Python, Go, JavaScript, SQL, Bash

Web Technologies: HTML5, CSS3, REST APIs

Frameworks & Libraries: React, Node.js, Express.js, Tailwind CSS, Spring Boot

Database & Cloud: MySQL, Firebase, AWS (EC2, S3, RDS)

Version Control & Tools: Git, GitHub Actions, Docker (basic), Postman, VS Code, IntelliJ IDEA

Concepts: Object-Oriented Programming, Database Design, API Development, Software Testing, Agile Workflow
